ABOUT US

About Axis Nova

Axis Nova Company is a contracting company based in Riyadh, Saudi Arabia. We build fiber optic networks for telecom operators, carry out civil works for main contractors and developers, and supply skilled manpower and heavy equipment with operators. We also maintain what we build.

Our teams have built long-distance and metro fiber routes for the Kingdom's telecom operators, covering survey, design, permits, execution, testing and maintenance. Our own staff handle site execution, planning, procurement and quality control. We work in Riyadh, Dammam, Al Hasa and Aqiq, and in other cities on request, in support of Saudi Vision 2030.

Vision

To be a contractor that clients in Saudi Arabia rely on for civil works, fiber optic networks, manpower and equipment.

Mission

We carry out civil works, build telecom infrastructure, rent out equipment and supply manpower. Safety, quality and delivery on time come first on every job. We work in line with Saudi Vision 2030.

Our values

- Safety before schedule and cost
- Work done to the specification
- Delivery on time and within budget
- Clear communication with clients
- One company responsible for the whole scope

Why clients work with us

- One contact for the whole scope, from survey to maintenance
- Fiber crews with experience on telecom operator networks
- Equipment supplied with certified operators, by the day or by the month
- Skilled workers who arrive with their tools and start on the first day
- Work completed in Riyadh, Dammam, Al Hasa and Aqiq

SERVICES

Services

Civil construction, fiber optic networks, skilled manpower supply and heavy equipment rental. We plan the work, carry it out and maintain it.

Civil Construction

Structures, site works and finishing for residential, commercial and industrial projects. We build to the specification, on schedule and to Saudi safety standards.

- Structural concrete: foundations, slabs, columns, beams
- Steel rebar and formwork
- Block work and plastering
- Scaffolding
- Waterproofing
- Tiling and marble
- Stone cladding
- Painting and coating
- Roads, utilities and reinstatement

Telecom & Fiber Optic Infrastructure

Fiber optic networks from route survey to maintenance: trenching and ducting, cable pulling and blowing, splicing, OTDR testing and acceptance.

- Civil works for fiber: trenching, ducting, chambers and cabinets, reinstatement
- Cable pulling and blowing (FOK machine with operator)
- Fiber splicing, OTDR testing and PAT
- Route design and marking, manhole and chamber installation, duct and pipe laying
- Termination and activation
- Tower and site work
- Electrical support for telecom systems: design study, load-flow analysis, implementation
- Operation & maintenance (O&M), troubleshooting

Skilled Manpower Supply

Trained tradespeople and supervisors for construction, fiber, facility management and oil and gas. They arrive on time with their tools. Rate card on request.

- Construction & infrastructure: masons, tile masons, civil workers, welders, painters, electricians, HVAC technicians, plumbers, carpenters
- Fiber technicians, splicers, equipment operators and supervisors
- Facility management: industrial and commercial cleaning, housekeeping, maintenance, janitorial
- Oil & gas: technicians, pipefitters, safety officers, engineers, industrial equipment operators
- Skilled and unskilled labour for building and infrastructure projects

Heavy Equipment Rental

Cranes, earthmoving and lifting equipment, generators and compressors with certified operators, by the day or by the month. Availability is shown on this site.

- Mobile cranes: rough terrain, all terrain, truck-mounted, city, crawler and tower cranes
- Heavy equipment: boom trucks, forklifts (electric, LPG, diesel), telehandlers, reach stackers, manlifts, scissor lifts, concrete mixers, excavators, loaders, bulldozers
- Industrial equipment: super suckers, bundle pullers, high-pressure water jetting, bolt torquing and tensioning, hopper cyclones, dust filters, industrial AC units, frac and ISO tanks
- Generators, compressors, scaffolding and power tools
- Short-term and long-term rental, tailored to the project

Where we work: Riyadh, Dammam, Al Khobar, Al Hasa and Aqiq. Other cities on request.

HOW WE WORK

How we work

01 Survey and scope

Site visit and a written scope with quantities and a schedule.

02 Plan and mobilise

Method statement, safety plan and permits. Crews, equipment and materials arrive on the agreed date.

03 Execute

Daily site reports and photos from the Field Team App. One supervisor is responsible for each site.

04 Test and hand over

Testing, as-built records and a signed handover.

05 Maintain

Operation and maintenance contracts after handover.

SAFETY AND QUALITY

HSE and Quality

Health, safety and the environment come before schedule and cost on every Axis Nova site. Every job has a safety plan, a trained supervisor and the right PPE before work starts. Incidents and near misses are reported the same day and reviewed by management.

Our HSE commitments

- Every worker receives a site induction before the first shift. The company supplies the PPE.
- A toolbox talk opens every working day on every site.
- Excavation, hot work, lifting and work at height run under a permit to work.
- Equipment is inspected before mobilisation and every month after that. Only certified operators drive it.
- Incidents and near misses are reported the same day, investigated and closed with an action.
- Waste is segregated and removed from site. Spills are contained and reported.

Quality approach

- Method statements and inspection and test plans are agreed before mobilisation.
- Daily site reports, photos and checklists are sent from the Field Team App and reach head office the same day.
- Certified operators, calibrated test equipment (OTDR, PAT) and traceable materials.
- Non-conformances are logged, closed and reviewed.
- As-built records and test results are delivered with every handover.
